- TRADITIONAL
- PRACTICAL
- BEST MATERIALS
- HIGH TOOL CULTURE

Japan has a centuries-old tradition of clay plasters. The surface design of the clay walls is of prime importance. The best evidence for the cultural significance of this craftsmanship is provided by the multitude of tools with which Japanese plasterers apply, smooth and craft the clay.

We offer an extensive selection of Japanese trowels and stucco tools. A special focus is our range of trowels for the professional crafting of edges, valleys and plaster finishes.

More detailed information can be found on the CLAY-TEC website

[www.claytec.de/en/products/Japanese-trowels](http://www.claytec.de/en/products/Japanese-trowels)

## Basecoat plaster trowel ARA-GOTE

Sturdy trowel made from Hon-Yaki steel to apply, spread and level coarse clay plaster. Blade 0.8 mm thick.

## Fine plaster trowel (ridged profile) SHIAGE-GOTE

Trowel for applying and spreading fine clay plaster and YOSIMA clay designer plaster. Blade 0.5 mm thick.

## Fine plaster trowel (flat profile) SHIAGE-GOTE

Trowel for smoothing and finishing fine clay plaster and YOSIMA clay designer plaster. Blade 0.3 mm thick.

## Fine plaster trowel NAMIKESHI

Trowel for smoothing and finishing YOSIMA clay designer plaster. Blade 0.3 mm thick.

## Fine plaster smoother (flat profile) KAKU-GOTE

Spreader for finishing coarse and fine clay plaster as well as YOSIMA clay designer plaster. Blade 0.4 mm thick.

## Plastic trowel SHIAGE-GOTE

This trowel is only used for finishing fine clay plaster and YOSIMA clay designer plaster so as to produce very smooth surfaces. Blade 1.0 mm thick (green), blade 2.0 mm thick (blue).
